

Bricking Bavaria

4. Bayerisches LEGO® Treffen 2007

The exhibition Bricking Bavaria 2007 was held on Fr. 5. – Su. 7. of October 2007 in Unterwössen in the Bavarian Alps near the lake Chiemsee.

31 people were showing their models to the visitors. A number of models were done in teamwork by different persons. The following themes were shown

- City with trains build by 7 people
- Star wars by 2 people
- Moon base by 5 people
- Mountain with Ninja temple by 3 people
- Church St. Peter Bacharach by 2 people
- Church Mariä Himmelfahrt
- Pigs by 2 people
- Truck models
- Humvee
- Firebrigade
- Various mosaics by 3 people
- Different Models from children of the area

Friday was the setup day. On Saturday and Sunday the exhibition was open for the public. Because it was in a valley and there are not so much villages around and not so much people living in the area, the number of visitors was as we could expect

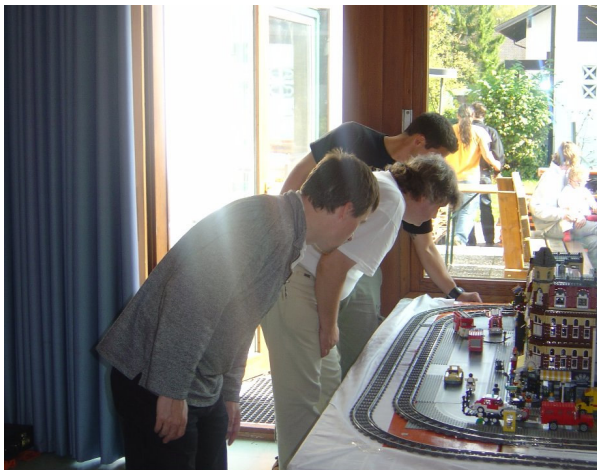

| | Sa | Su | Sum |
|-----------------|-----|-----|-----|
| Adults | 86 | 93 | 179 |
| children paying | 134 | 265 | 399 |
| children free | 29 | 30 | 59 |
| | 249 | 388 | 637 |

We also had a number of visitors from Austria and several teams from the Austrian Lego Group were showing up.

Saturday night we have had a common dinner event in a hotel near by.

From financial point of view there is a positive balance between costs and earnings, means that there is money left, which will be used by the Bricking Bavaria team for the events which are planned for the next years.

Is there a problem with the tracks?

How can somebody build this with Lego?

Having always something moving: balls

or trains

Just watching

or giving explanations

All in all it was a nice event and all were really feeling comfortable, the Bricking Bavaria team, the guests and the visitors.
